Action game: ELDEN RING looks very promising, I am hoping for a traditional story with the traditional style of gameplay for this title. I also hope that will be able to make some online co-op action for this game im going to try this game. i already played mods for grand theft auto on xbox (halo wars) and i liked it i guess this game looks great. not sure if this is a mmo game. but will wait and see. Mr. Pee is a company that sells video game deals for a living. Observation of an anisotropic solid-liquid structural phase transition of carbon dioxide. Freezing of solid carbon dioxide (CO<sub>2</sub>) under pressure has been studied as a function of temperature up to ~70 K with an x-ray diffraction method. The pressure-temperature (P-T) phase diagram has been constructed in a wide pressure region for the first time and qualitatively analyzed in comparison with that of hydrogen sulfide (H<sub>2</sub>S). An anisotropic structural phase transition to a low-density anorthorhombic phase was observed at ~30 K in CO<sub>2</sub>, where the density varies with a change from 6.9 to 10.1 g/cm<sup>3</sup> at 25 K. This solid-liquid structural phase transition was confirmed in the large-unit-cell phase (LUC phase), which was named as the 12-layer (12L) phase to distinguish it from the orthorhombic phase of the traditional 3-layer (3L) structure. The 12L phase has a body-centered tetragonal (bct) structure with the superlattice space of 12.2 Å in the P6mm symmetry in contrast to the conventional bct structure

of 3.4 Å in the Pnma symmetry. The 12L phase abruptly decomposed to the low-density monoclinic orthorhombic phase at ~35 K with a structural transition of the lattice parameters and the relative changes in the internal angle of the lattice. The properties of the 12L phase are compared with those of H<sub>2</sub>S and with general models of the 12L phase with a wide
