If I want to use them, what should be my licensed options? I didn't find any other option that is not a source code, I couldn't find any license other than the Microsoft license. My Question is, is it possible? A: When working with open source libraries, you are quite limited in what you can do to your project. You have to make sure that the license stipulates the following: It's okay for you to use the library in your project, as long as you include the source code, and you make sure your project is not distributed to others It's okay for you to change the source code in any way you wish, as long as you make your modifications public You are not allowed to merge the source code into your project You are not allowed to redistribute the project - that is, you must put it in such a way that people can't just download it and run it.
