Appnimi Password Helper [2022-Latest]

Appnimi Password Helper is a small software application designed specifically for helping you generate random passwords that can be used for different online accounts or programs. Simple looks The tool was designed with an overall simplicity in mind, so there's support only for a few settings that you can tinker with. All the program's functions are embedded in a single window, so tweaking the dedicated parameters proves to be an easy task. How it works Appnimi Password Helper gives you the possibility to generate a random password by providing details about the master password and name of the website. What's more, you are allowed to copy the password to the clipboard, so you can easily paste it into other third-party utilities. Performance There's no support for many configuration settings, so even less experienced users can make the most out of this tool in no time. Tests have shown that Appnimi Password Helper carries out a task quickly and without errors. It leaves a minimal footprint on system resources, so the overall performance of the computer is not affected. Where it falls short On the downside, the program doesn't come packed with advanced features that could help you conceal the generated password behind asterisks, generate a user-defined number of passwords, export the password data to plain text file format, and insert special characters, just to name a few suggestions. Bottom line To sum things up, Appnimi Password Helper proves to be a simplistic piece of software that comes bundled with limited features in order to help you create random passwords, and is suitable especially for rookies.
