What's new:

The Supports of our World

As we provide the players with a beautiful battlefield in a world that takes great pains and consideration for detail, we also take care of the players by enhancing various features. We guarantee that our game offers the most immersive and exciting battle experience.

1. An Updated Version of the Battleship Game (Online Multiplayer) The battle variety in Tales of Zestiria has exponentially increased, thanks to Adventurers Guild, an organized group where players can connect with each other in order to battle it out successfully. A Constant, Successive Battle is about to Break Out

To be the X-Class Adventurer you need to be stronger than ever. The previous version of Adventurers Guild will soon cease to function. All of your friends are waiting in a brand new online battle space called Adventurers Guild. You'll be launched into the heat of battle by the participation of allies in new combat scenes. Only 1 per class. Truly exciting moments ahead!

2. Adventurers Guild: 5 Classes of Skill Increase The shared space is called an Adventurers Guild. It was first developed for Tales of Xillia 2, and finally implemented in Zestiria. The battles that players enter go into a set battles that are realistic and exciting. However, because of the limited number of available classes, the number of days waiting to enter the battle is too long in the online world. Now with Adventurers Guild, Online Players can set the number of classes, the pace, and not be limited by nothing. They can run individual adventures at their own pace and enter fight scenes at any time. Adventurers Guild is intended to ensure very diverse combat.

3. Adventurers Guild Features 2 Classes for Each Party Member and Discovery of Classes Are Undecided

The Adventurers Guild offers you the opportunity to enjoy a sophisticated and varied battle with a fresh angle. The game also opens up the same Adventurers Guild with 2 classes for each of the main members and will open up an original method of class discovery for users.

4. Battleship Engine, Among The Best Talent of Worldwide Gaming

The battle ship engine is optimized to bring the newest advancements in customization engine and engine of Japanese development studios. The utilization of nvidia's graphics engine with our engine is perfect to satisfy the enjoyment of challenge for the PCs of many
